

HORTNET

HORTNET – (Management Information System)

Commissionerate of Horticulture and Plantation Crops is implementing National Horticulture Mission. Under National Horticulture Mission, in order to have a beneficiary level interface at the district level and below, and to streamline the sanction process of NHM activities, a work flow based Management Information System (MIS) software has been developed by NIC. This MIS is being maintained and necessary data is being fed in the NHM portal by Commissionerate of Horticulture and Plantation Crops regularly.
